Figure 1 is a line graph illustrating the number of cases of COVID-19 in the United States over time. The horizontal axis (x-axis) is labeled with months, ranging from 0 to 2. The vertical axis (y-axis) represents the number of cases, with a scale from 0 to 100,000. The graph shows a significant increase in cases starting around March 2020, reaching a peak of approximately 100,000 cases in May 2020. Following this peak, the number of cases declines but then rises again, reaching a second, even higher peak of over 100,000 cases in March 2021.
