34 [5:36][8:34]

Figure 1: Number of cases of COVID-19 in the United States. The graph shows a significant increase in cases starting in March 2020, peaking in May 2020 at approximately 10 million cases, followed by a decline and then a second, larger peak in January 2021 at approximately 20 million cases. The data points are connected by a line, and the area under the line is shaded.
